1. Burger, M., DiFrancesco, M., Fagioli, S. and Stevens, A. (2017): Sorting Phenomena in a Mathematical Model For Two Mutually Attracting/Repelling Species. Preprint arXiv:1704.04179, submitted for Journal publication .
2. Stevens A. and Velázquez J.J.L. (2017): Asymptotic analysis of a chemotaxis system with non-diffusive memory. Submitted to EJAM. Preprint available at MPI MIS, Leipzig.
3. Stevens, A. (2017): Mathematics in the Life-Sciences: A Personal Point of View. To appear in: Jahresbericht der Deutschen Mathematiker Vereinigung (DMV).
4. Scheel, A. and Stevens, A. (2017): Wavenumber selection mechanisms in coupled transport equations. *J. Math. Biol.*, first online Feb. 2017.
5. Grosskinsky, S., Marahrens, D. and Stevens, A. (2017): A hydrodynamic limit for chemotaxis in a given heterogeneous environment. *Vietnam J. Math.*, Vol. 45, No. 1-2, 127–152.
6. Kang, K and Stevens, A. (2016): Blowup and global solutions in a chemotaxis-growth system. *Nonlinear Anal.*, Vol. 135, 57–72.
7. Stevens, A. (2015): The International Conference: Nonlinear Phenomena in Biology, Physics and Mechanics, Munich 2014. In honor of M. Efendiev on the occasion of his 60st birthday. *Math. Methods Appl. Sci.*, Vol. 38, No. 16, 3381–3383. Guesteditor, together with F. Hamel, M. Otani, and J.R.L. Webb.
8. Fuhrmann J. and Stevens, A. (2015): A free boundary problem for cell motion. *Differential Integral Equations*, Vol. 28, No. 7-8, 695–732.
9. Freistühler H., Fuhrmann J. and Stevens A. (2014): Traveling waves emerging in a diffusive moving filament system. Managing complexity, reducing perplexity. *Modeling biological systems*. Eds. G. Ajmone-Marsan, M. Delitala, Springer. 91–100.

10. Primi I., Stevens A. and Velázquez J.J.L. (2013): Pattern forming instabilities driven by non-diffusive interaction. *Netw. Heterog. Media*, Vol. 8, No. 1, 397–432.
11. Espejo E.E., Stevens A. and Suzuki T. (2012): Simultaneous Blowup and Mass Separation During Collapse in an Interacting System of Chemotactic Species. *Differential and Integral Equations*, Vol. 25, No. 3-4, 251–288.
12. Horstmann D. and Stevens A. (2011): Origins of Theoretical Biology. *European Communications in Mathematical and Theoretical Biology*. No. 14, 94–103.
13. Stevens A. (2011): Angewandte Analysis. In *Facettenreiche Mathematik: Einblicke in die moderne mathematische Forschung*. 327–346. Eds. K. Wendland, A. Werner. Vieweg und Teubner Verlag.
14. Wiebel A., Chan R., Wolf C., Robitzki A., Stevens A. and Scheuermann G. (2010): Topological flow structure in a mathematical model for rotation-mediated cell aggregation. *Topological Methods in Data Analysis and Visualization*. 193–204. Eds. Pascucci, Tricoche, Hagen, Tierny. Springer Verlag. labelrotational
15. Espejo E. E., Stevens A. and Velázquez J.J.L. (2010): A note on non-simultaneous blow-up for a drift-diffusion model. *Differential and Integral Equations*, Vol. 23, no. 5-6, 451–462.
16. KANG K., Stevens A. and Velázquez J.J.L. (2010): Qualitative behavior of a Keller-Segel model with non-diffusive memory. *Communications in PDE*, Vol. 35, no. 2, 245–274.
17. Stevens, A. (2009): Mathematical biology: Abstracts from workshop May 3-9, 2009. *Oberwolfach Reports*, Vol. 6, no.2, 1303–1373. Organized together with E. DiBenedetto and B. Perthame.
18. ESPEJO E. E., Stevens A. and Velázquez J.J.L. (2009): Simultaneous finite time blow-up in a two species model for chemotaxis. *Analysis*, Vol. 29, no. 3, 317–338.
19. PRIMI I., Stevens A. and Velázquez J.J.L. (2009): Mass-selection in alignment models with non-deterministic effects. *Communications in PDE*, Vol. 34, 419–456.
20. KANG K., Perthame B., Stevens A. and Velázquez J.J.L. (2009): An integro-differential equation model for alignment and orientational aggregation. *J. of Differential Equations*, Vol. 246, 1387–1421.
21. DKHIL F. and STEVENS A. (2009): Traveling wave speeds in rapidly oscillating media. *DCDS*, Vol. 26, no. 1, 89–108.

22. STEVENS A. and VELÁZQUEZ J.J.L. (2008): Partial differential equations and non-diffusive structures. *Nonlinearity*, Vol. 21, T283–T289.
23. STEVENS A. (2008): Buchkapitel: Mathematik und Biowissenschaften. Berufs- und Karriereplaner Mathematik. Schlüsselqualifikation für Technik, Wirtschaft und IT. Vieweg + Teubner Verlag.
24. FUHRMANN J., Käs J. and STEVENS A. (2007): *Initiation of cytoskeletal asymmetry for cell polarization and movement*. *J. of Theo. Biol.* 249, 278–288.
25. Stevens, A. (2006): Mathematical biology: Abstracts from workshop May 14–20, 2006. *Oberwolfach Reports*, Vol. 3, no.2, 1385–1461. Organized together with E. DiBenedetto and B. Perthame.
26. DKHIL F. and STEVENS A. (2006): *Traveling wave speeds of nonlocally perturbed reaction diffusion equations*. *Asymptot. Anal.* 46 , No. 1, 81–91.
27. HWANG H.J., KANG K. and STEVENS A. (2006): *Global existence of classical solutions for a hyperbolic chemotaxis model and its parabolic limit*. *Indiana Univ. Math. J.* 55, No. 1, 289–316.
28. STEVENS A. and Sjøgaard-Andersen, L. (2005): *Making waves: pattern formation by a cell-surface-associated signal*. *Trends Microbiol.*, Vol. 13, No. 6, 249–252.
29. HWANG H.J., KANG K. and STEVENS A. (2005): *Global solutions of transport equations for chemosensitive movement*. *SIAM J. Math. Analysis*, Vol. 36, No. 4, 1177–1199.
30. HWANG H.J., KANG K. and STEVENS A. (2005): *Drift-diffusion limits of kinetic models for chemotaxis: a generalization*. *DCDS-b*, Vol. 5, No. 2, 319–334.
31. HORSTMANN D. and STEVENS A. (2004): *A constructive approach to traveling waves in chemotaxis*. *J. Nonlinear Sci.*, Vol. 14, No. 1, 1–25.
32. LUTSCHER F. and STEVENS A. (2002): *Emerging patterns in a hyperbolic model for locally interacting cell systems*. *J. Nonlinear Sci.*, Vol. 12, No. 6, 619–640.
33. HEINZE S., PAPANICOLAOU G. and STEVENS A. (2001): *Variational principles for propagation speeds in inhomogeneous media*. *SIAM J. of Appl. Math.*, Vol. 62, No. 1, 129–148.
34. STEVENS, A. (2000): *Derivation of chemotaxis-equations as limit dynamics of moderately interacting stochastic many particle systems*. *SIAM J. of Appl. Math.*, Vol. 61, No. 1, 183–212.

35. STEVENS, A. (2000): *A stochastic cellular automaton, modeling gliding and aggregation of Myxobacteria*. SIAM J. of Appl. Math., Vol. 61, No. 1, 172-182.
36. HILLEN T. and STEVENS A. (2000): *Hyperbolic models for chemotaxis in 1-D*. Nonlinear Analysis: Real World Applications, Vol. 1, No. 3., 409–433.
37. STEVENS, A. and SCHWEITZER F. (1997): *Aggregation induced by diffusing and non-diffusing media*. Dynamics of Cell and Tissue Motion. Eds. W. Alt, A. Deutsch, G. Dunn. Birkhäuser, Basel: 183 - 192. (Refereed)
38. OTHMER, H.G. and STEVENS, A. (1997): *Aggregation, blowup and collapse: the ABC's of taxis in reinforced random walks*. SIAM J. of Appl. Math., Vol. 57, No. 4, 1044-1081.
39. STEVENS, A. (1996): *Simulation of chemotaxis-equations in two space dimensions*. Nonlinear Physics of Complex Systems - Current Status and Future Trends. Eds. J. Parisi, S. C. Müller, and W. Zimmermann. Springer Verlag, Berlin.
40. STEVENS, A. (1995): *Trail following and aggregation of Myxobacteria*. J. of Biol. Systems, Vol. 3, 1059-1068.
41. STEVENS, A. (1993): *Aggregation of Myxobacteria - a many particle system*. First European Conference of Mathematics Applied to Biology and Medicine. Wuerz Publishing, Winnipeg: 519 - 524.
42. STEVENS, A. (1991): *A model for gliding and aggregation of Myxobacteria*. Nonlinear wave processes in excitable media. Eds. A. Holden, M. Markus, H.G. Othmer. Plenum Press, New York: 269 - 276.
43. STEVENS, A. (1990): *Simulations of the aggregation and gliding behavior of Myxobacteria*. Biological motion. Lecture Notes in Biomathematics 89. Eds. W. Alt, G. Hoffmann. Springer Verlag Berlin, Heidelberg: 548 - 555. (Refereed)
